

BONTHA VISHNU VARDHAN

M.Sc. AI & DS Student | Data Scientist | Data Analyst | Python Developer

+91 9398524210 | vishnuvardhan93985@gmail.com | LinkedIn | GitHub | Leet code

PROFESSIONAL SUMMARY

M.Sc. Artificial Intelligence & Data Science student with practical experience in data analysis, data visualization, and machine learning using Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, and Excel. Experienced in data cleaning and exploratory data analysis (EDA) to extract insights from data.

Completed projects including Customer Segmentation and Campaign Response Prediction using Machine Learning. Previously worked as an IT Trainer at Udayan Care, mentoring 150+ students and conducting hands-on sessions on data analysis concepts.

TECHNICAL SKILLS

- **Programming** : Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R (basic), Flask, HTML, CSS
- **Databases** : MySQL, SQL
- **Visualization** : Excel (Pivot Tables, Slicers), Google Sheets
- **Other Tools** : GitHub, Jupyter Notebook, VS Code, Google Colab
- **Techniques & Concepts**: Data Cleaning, EDA, Dashboarding, Reporting, Statistics, Machine Learning

WORK EXPERIENCE

IT Trainer -- Udayan Care Secunderabad , Dec 2023 – Aug 2024

- Conducted hands-on workshops on data cleaning, visualization, and reporting using Excel
- Designed real-time analytics mini-projects, enabling learners to analyze datasets and build dashboards
- Automated reporting workflows using Excel reducing manual effort and improving reporting efficiency
- Mentored 150+ students, resulting in measurable improvements in analytical skills and performance

PROJECTS

Customer Segmentation & Re-attention Analysis

- Performed data cleaning and exploratory data analysis (EDA) on customer data.
- Applied machine learning clustering techniques to segment customers based on purchasing behavior.
- Conducted re-attention analysis to identify potential customers for future marketing campaigns.

House Price Prediction

- Built a machine learning regression model using Python and Scikit-learn to predict house prices.
- Performed data preprocessing, feature analysis, and model evaluation to improve prediction accuracy.

School Dropout Analysis

- Conducted EDA to identify factors contributing to student dropouts.
- Visualized patterns and trends using Python data visualization libraries to support data-driven insights

ACHIEVEMENTS

- Mentored **150+ students** as an IT Trainer, improving analytical performance by **80%** through hands-on learning.
- Participated in **School Dropout Analysis Hackathon (2024)** and identified key factors influencing student dropout patterns using data analysis.
- Built and shared **interactive data dashboards and analytics projects**, improving engagement and demonstrating practical data analysis skills.

CERTIFICATIONS

Communication, Research & Career Readiness Workshop — JNTUA (Mar 2026)

Two-day training workshop conducted under the ANRF-PAIR Program in collaboration with the American Chemical Society (ACS).

Hacker Rank

Learned SQL queries, joins, and data analysis fundamentals.

Advanced Excel — Simplilearn

Covered data cleaning, Pivot Tables, and data visualization techniques.

Python Developer Certification — Udayan Care

Learned Python programming

EDUCATION

M.Sc. Artificial Intelligence & Data Science

Central University of Andhra Pradesh (CUAP) | Aug 2025 – May 2027

Bachelor of Computer Applications (BCA)

Government City College, Osmania University | Aug 2022 – May 2025
